PART I: OVERALL PROJECT DESCRIPTION

1. Brief Project Description:

When dealing with international and regional fisheries related issues that might affect the sustainable development and management of fisheries and aquaculture, it is necessary to strengthen SEAFDEC network with all ASEAN Member States, as well as inter-agencies coordination at regional and country levels. In order to ensure that all of SEAFDEC programs and activities meet the requirements of the SEAFDEC Member Countries, aim of this project is to monitor and evaluate all SEAFDEC programs. In addition, the project also supports the dissemination of the results/outputs from activities/programs through the SEAFDEC quarterly publications such as Fish for the People.

2. Background and Justification:

SEAFDEC has been working on the promotion of Sustainable Fisheries Development in the Southeast Asian region since its establishment in 1967. The SEAFDEC program frameworks to support member countries has been significantly changed in 1998 when SEAFDEC adopted the Resolution on SEAFDEC Strategic plans at the 30th Meeting of the SEAFDEC Council and more clear after the new millennium in 2001 when ASEAN-SEAFDEC adopted the Resolution and Plan of Action on Sustainable Fisheries for Food Security in the ASEAN Region” as well as the new decade Resolution and Plan of Action on Sustainable Fisheries for Food Security toward 2020 in 2011 as a policy guidelines for SEAFDEC and member countries. To support the implementation of the Resolution and Plan of Action, taking into account environmental changes and many policy emerging issues pressing at global and regional levels including the problems of IUU fishing, SEAFDEC therefore proposes a continuing project to strengthening SEAFDEC network among ASEAN country in order to move forward on sustainable utilization of fisheries resources in the region. In conjunction to this, the strengthening cooperation within the region and Member Countries needs to be strengthened and included in the project framework in order to share and exchange information and transferring messages/information to work together to meet the final goal of the ASEAN SEAFDEC Resolutions and Plan of Action that has been committed by all Member Countries.

In addition, to ensure that proposed activities to support Member Countries could meet the final goal as proposed, the monitoring and evaluation of overall SEAFDEC programs will be carried out. The regional outputs and publications from SEAFDEC activities will then be published/disseminated and shared among Member Countries and with other regional and international organizations through the quarterly magazine or the specific publication such as Fish for the People.

This project supports the 2011 ASEAN-SEAFDEC Resolution No. 3 “Strengthen human capacity of

relevant stakeholders through mobilization of resources and the harmonization of initiatives that support fisheries communities and governments, with a special focus on the women and youth”. The Project also supports the Resolution No. 8 on “Foster cooperation among ASEAN Member Countries and with international and regional organizations in combating IUU fishing”.
